REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 4,5,16-18 are allowable over the prior art of record, because the prior art is silent to a method of forming a protection film for a battery comprising: applying an organic coating to a metal foil and laminating the metal foil to a metal substrate having a first hole there through, wherein the metal substrate is applied to a closing plate having a second hole, such that the first hole and second hole are connected, and the metal substrate and closing plate are adhered together around the second hole.

Claims 10-13,19 & 20 are allowable over the prior art of record, because the prior art is silent to a method of forming a protection film for a battery comprising: applying an organic coating to a metal foil and laminating the metal foil to a metal substrate having a first hole there through, wherein the metal substrate is applied to a closing plate having a second hole, such that the first hole and second hole are connected, and the metal substrate and closing plate are adhered together around the second hole.

The prior art, such as Tanaka U.S. Patent 5,580,679, teaches a metal substrate 11 with a first hole and a closing plate 8 with a second hole. The reference is silent to the first hole and second hole being connected such that first hole adheres around the second hole of the closing plate. Therefore, the reference is patentably distinct from the instant claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
